I am currently a 6th-year student (Master Y2 - RIBA P.II) at Manchester School of Architecture with broad experience in different positions within the industry. I believe that my passion for detail aesthetics, interest in construction practices and sustainable methodologies, have equipped me with the confidence in suggesting quick and accurate design solutions. I consider teamwork essential, and the client's brief always a priority; therefore I have worked closely with different professionals (Engineers, QS, PM, Builders, Joiners) that broadened my understanding of the industry and assisted me in ensuring quality output.

I am always looking for opportunities that will challenge me, push my creative boundaries further; whilst allowing me to prove myself as an essential member of a team.

GENERAL SKILLS

• Language:

Greek (Mother tongue)

English (Fluent)
